DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a kitchen grease removal method, classified in class 126, subclass 299E.
 - II. Claim 3, drawn to a baffle filter, classified in class 55, subclass 307.
 - III. Claim 4 is, drawn to a method for controlling and monitoring a system, classified in class 454, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I , III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method as claimed in claim 1 is dealing with cleaning process which can be carried out by other apparatus, e.g. any garden nozzles. The claimed process of claim 4 deals with ventilation process which can be carried out by other apparatus, e.g. condition responsive exhaust fan. It should be noted the filter structure as claimed in claim 2 is not required by the process claims of 1 and 4. Inventions I and III are unrelated.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3749

4. Because these inventions are distinct for the reasons given above and the search required for Groups I, II are not required for Group III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to MARK A. OATHOUT on Sept. 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jiping Lu whose telephone number is 703-308-2354. The examiner can normally be reached on Monday-Friday, 9:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira Lazarus can be reached on 703 308-1935. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-1113.
